荷蘭代爾夫特大學航空航太工程學院教授
Professor and Director of the Safety Science Innovation Laboratory,
Griffith University, Australia
Professor, Faculty of Aerospace Engineering,

Sidney Dekker (美國俄亥俄州立大學博士，1996年)是澳洲格里菲斯大學安全科學創新實驗室的教授和總監，同時也是荷蘭代爾夫特大學航空航太工程學院的教授。Sidney曾在四大洲的7個國家生活和工作，並因其在人為因素和安全方面的開創性工作於國際上贏得了讚譽。他在2012年創造了「Safety Differently」一詞，漸漸演變成全球變革運動。這運動鼓勵組織整頓其官僚作風，為人們提供框架內的自由，令事情順利；並適時給予同情、重組和學習。

作為一名狂熱的鋼琴演奏家和飛行員，他一直在為一家航空公司駕駛波音737。

Sidney更是近年暢銷書作者，其著作有Foundations of Safety Science; The Safety Anarchist; The End of Heaven; Just Culture; Safety Differently; The Field Guide to Understanding 'Human Error'; Second Victim; Drift into Failure; Patient Safety; Compliance Capitalism 和 Do Safety Differently。Sidney曾參與紀錄片：2017年「Safety Differently」、2018年「Just Culture」和「The Complexity of Failure」，以及2019年「Doing Safety Differently」。史丹福大學將 Sidney 列為世界上最具影響力百分之二的科學家，其著作引用超過16,200次，並且獲得了56 h-index。

Sidney Dekker (PhD Ohio State University, USA, 1996) is Professor and Director of the Safety Science Innovation Lab at Griffith University in Australia, and Professor at the Faculty of Aerospace Engineering at Delft University in the Netherlands. Sidney has lived and worked in 7 countries across four continents and won worldwide acclaim for his groundbreaking work in human factors and safety. He coined the term 'Safety Differently' in 2012, which has since turned into a global movement for change. It encourages organizations to declutter their bureaucracy and provide people freedom-in-a-frame to make things go well-and to offer compassion, restoration and learning when they don't.

An avid piano player and pilot, he has been flying the Boeing 737 for an airline on the side.

Sidney is bestselling author of, most recently: Foundations of Safety Science; The Safety Anarchist; The End of Heaven; Just Culture; Safety Differently; The Field Guide to Understanding 'Human Error'; Second Victim; Drift into Failure; Patient Safety; Compliance Capitalism and Do Safety Differently.

He has co-directed the documentaries that are "Safety Differently" in 2017; "Just Culture" and "The Complexity of Failure" in 2018, and "Doing Safety Differently" in 2019. Stanford has ranked Sidney among the world's top 2% most influential scientists: His work has well over to 16,200 citations and an h-index of 56.
